EXPERIENCE

I currently **haven't professional experience**. However, I have done some personal and academic projects in which I have tested my knowledge, learned new technologies, and reinforced the concepts I already had. Some of these are:

▶ Tomato Time HTML CSS JavaScript

With this application you can track your concentration time, using the Pomodoro technique, which can be customized to your needs.

▶ FitApp HTML CSS JavaScript Firebase

This app can help you track your weight, BMI, muscle mass percentage and water percentage.

▶ Personal Website React.js SCSS

This is my personal website or portfolio where I show the projects I have done around Frontend Development.

▶ Purple Calendar HTML CSS JavaScript

This is a simple monthly calendar that allows you to navigate between months. Here you can also go to a specific month and year.

More details can be found at camilapaladines.netlify.app.

EDUCATION

▶ Computer Science and Engineering 2018 - 2022

Pontificia Universidad Javeriana - Cali, Colombia

ABOUT

I'm a Computer Science student with an interest in Frontend Development. I'm looking to collaborate in the construction of software that generates value to different areas, and that contribute significantly to their growth.

SKILLS

Languages

HTML, CSS, SCSS, JavaScript, Python

Libraries & Frameworks

React.js

Tools & Platforms

Git, Firebase, Figma, Scrum
